

GRAINPRO® & IRRI RICE QUALITY TEST KIT™

Complete your post-harvest process with innovative tools
that support hermetic solutions!

Features & Advantages

- Portable
- Easy to use
- Better understand the different aspects of grain quality
- Can be a tool for root cause analysis
- Can prevent future losses
- Can aid in price identification
- Make better decisions in post-harvest management

The GrainPro® IRRI Rice Quality Test kit™ consists of a collection of tools that can be used by post-harvest trainers, extension workers, and post-harvest practitioners to easily and quickly quantify traits of paddy, brown rice, milled rice, and seeds. This is to better understand the rice quality traits and factors in rice production and processing. It helps farmers and processors to quantify rice quality so that they can identify problems and make the necessary adjustments to minimize quality loss along the rice value chain.

**The GrainPro® & IRRI Rice Quality Test Kit™
consists the following tools:**

Grain Moisture Meter
(for Paddy, Brown rice and Polished rice)

Palm husker

Infrared thermometer with hygrometer

Graduated cylinder

Caliper

Indent sheet grader

Magnifier

Mini scale

EMC table

Psychrometric chart
(for drying and ambient air)
