

GRAINPRO® TRANSAFELINER™

Protect commodities without worrying about insect infestation losses and mold growth in transit!

Features & Advantages

- Excellent air and moisture barriers that preserve flavors, aroma, and quality.
- Built with pre-welded loops, carabiners, and elastic strings for secure and efficient installation.
- Protects against mold growth, infestations, and condensation during transit.
- Enables chemical-free preservation suitable for organic products.

The **GrainPro® TranSafeliner™** protects dry agricultural commodities shipped in bags or on pallets, and designed to preserve quality and minimize post-harvest losses during transit.

It is made of a **hermetic multi-layer film** that blocks air and moisture, preventing oxidation and condensation. This naturally inhibits mold growth, limits microbial activity, and eliminates infestations without using toxic and synthetic fumigants.

The TranSafeliner™ is built for easy installation and has two available sizes applicable for 20' and 40' standard container.

APPROXIMATE CAPACITY
Based on Cocoa Beans

Product Laid-Flat Dimensions L (cm) x W (cm)	TRANSAFELINER 20' 900 cm x 500 cm	TRANSAFELINER 40' 1,500 cm x 500 cm
Container Compatibility	Fits standard 20 ft shipping container	Fits standard 40 ft shipping container
FIBC, Jumbo, or Tonner Bags	20	40
65-kg Woven PP or Jute Bags	230	385

Disclaimer: While 40-ft containers have double the volume of 20-ft containers, **the weight capacity is determined by international shipping safety standards and structural limits.**

The approximate capacity provided above is based on our computation. Capacity variance based on the actual commodity will apply.
